Landmark Center 1 and 2 Orlando, FL

Roofing Contractor: RSS Roofing Services & Solutions
Project Size: 64,600 square feet
Products: Self-adhered single-ply roof system

This project consisted of a 64,600 sq. ft reroof and skylight replacement on the Landmark Center 1 and 2, both seven story buildings in the heart of Orlando with a great view into historic Lake Eola.

This project was a full BUR removal and replaced with a self-adhered single-ply roof system. The roof replacement brought a unique challenge due to their location as work was limited to third shift and was coordinated with local government authorities for all mobilization and logistics.
